Subject: IMPORTANT: 2016 California Advanced Homes Program Closeout Update

Good Morning BIA Baldy View Team,
The 2016 CAHP Application deadlines are fast approaching! If you have any additional projects permitted under the 2013 Title 24 Code that you plan to submit to CAHP, our CAHP application deadlines are listed below. All complete application packages (Title 24 docs, architectural plans, site plans, address lists, and builder signed CAHP Agreements) must be submitted to

SoCalGas by 12/15/16 in order to be considered for CAHP incentives under our current incentive program.

Once our 2017 CAHP Program for the new 2016 Title 24 permitted lots is approved and open for enrollment, I'll be in touch to review the new program in detail.

Please let me know if you plan to submit more 2013 Title 24 Code projects before the 12/15/16 deadline.
Thank you,
Matt

Matt Noon | So Cal Gas

Dear Valued Customer:

We appreciate your past participation in the California Advanced Homes Program (CAHP) and look forward to the continued opportunity to assist you in the endeavor to build for a more energy efficient future.

As you know, the new 2016 Title 24 California Energy Efficiency Code is set to go into effect January 1, 2017. With that, CAHP will be launching a redesigned and improved program to assist and reward our builder customers who go above and beyond in striving to achieve greater energy savings.

As we prepare for the closeout of the 2016 CAHP, we'd like to remind you of a few important points:

December 7, 2016
For your 2013 Title 24 Code permitted projects:
We strongly recommend having your completed CAHP enrollment packet submitted to your SoCalGas representative no later than December 7, 2016. Historically, at end of Title 24 Code cycles

SoCalGas has experienced a significant increase in its CAHP project enrollment volume immediately preceding the project submittal deadline. Providing your completed CAHP project enrollment packet by December 7, 2016 will allow your account representative time to review your information, request any potential corrections, and acquire your signature on a 2016 Agreement prior to the December 15, 2016 deadline.

December 15, 2016
For your 2013 Title 24 Code permitted projects:
To be eligible for the 2016 CAHP, a completed, original CAHP Agreement MUST be postmarked or received by your SoCalGas CAHP representative no later than December15, 2016 (or sooner if funds are expended or fully committed). Please complete one application per project and list all plans/models and building types.

SoCalGas/SCE CAHP Acceptance Status
As many of you may be aware, Southern California Edison (SCE) recently announced its intent to shut down its CAHP program for future enrollments. At this time, SoCalGas is continuing to accept CAHP enrollments; however, we can only confirm that gas incentives funded via SoCalGas will be paid on future CAHP enrollments in the joint SoCalGas/SCE service territory. Unfortunately, due to SCE's withdrawal from the CAHP program, we will be unable to pay incentives for the electrical savings generated on future projects.

SoCalGas/LADWP CAHP Acceptance Status
We are pleased to inform you that our municipal partner, LADWP has reconfirmed their commitment to CAHP. Therefore, projects enrolled in the joint SoCalGas/LADWP service territory will continue to receive the entire CAHP incentive for both electrical and natural gas incentives.

As always, the SoCalGas CAHP team wants to help your business grow, improve your bottom-line and differentiate your new homes at the same time. Our experienced account representatives are ready to assist you with all stages of your project, from the pre-design phase to delivery of your incentive check after your project is inspected. We very much appreciate your business and we'll work hard to keep it.

We look forward to the opportunity to be of service.

All the best,

SoCalGas Residential New Construction Team
